

CAD Lecture 6

1. In Command option write un, then enter. Choose Engineering option instead of Decimal and Precision > 2nd Option.
2. In Command option write d, then enter. Choose modify > Primary units > then choose Engineering option instead of Decimal and Precision > 2nd Option.
3. To make reduce the size of the drawing in your display, Choose View > Zoom > Out (Several times as you need).
4. First draw all the black hidden lines (but in **by layer option that means straight line**) of the outlines.
5. Then draw all the hidden lines (**but in by layer option that means straight line**) of the inside of the apartment.
6. Then give the offset.
7. Then fillet option.
8. Now change all the **by layer option that means straight line** into hidden lines.
9. All the dimensions given inside (Drawing, Dining, Toilet etc.) without considering the offset distance.
10. Take offset distance 5" (Also for the stairs).
11. Give dimensions (change the dimension height to see it in the screen) and Text.

CAD Lecture 7 & 8

*SB of toilet > Outside wall

*SDB > Drawing room
